## User Manual

### **THE FOLLOWING TERMS AND CONDITIONS APPLY:**

While all attempts have been made to verify information provided, neither I, nor any ancillary party, assumes any responsibility for errors, omissions, or contradictory interpretation of the subject matter herein.

As required by FTC rules, we want to inform you that results are not typical. We do not guarantee or imply that using our software will make you rich or generate any income at all. This software has no affiliation with Amazon, Facebook, Instagram, or any other sites. We are not responsible for how you use this software, and your income or results, if any, will vary.

Software and associated files is distributed as is without any warranty of any kind, either express or implied.

# Software Activation

When you launch the software for the first time, you'll need to enter an activation key. Enter the following key to get started:

92vtsv

That will activate it. If you need to change your activation key, click the "Activation" button.

## Using the Software

Using the software is really easy.

First, click this button...

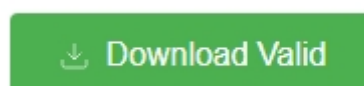

... And select a .TXT file with e-mail addresses (one per line, up to 1000 e-mail addresses).

This will scan your list and will filter + remove different e-mails (invalid, duplicates, disposable).

*Tip 1: You can see the list of disposable domains that the software can detect by clicking the "Disposable Domains" link.*

*Tip 2: If you make changes to a .txt file (example: add more e-mail addresses etc), and want to analyze the file again, then you need to re-open the file.*

When the process has finished, you can download the valid e-mails by clicking this button...

... And That's All!
