As required by FTC rules, we want to inform you that results are not typical. We do not guarantee or imply that using our software will make you rich or generate any income at all. Its functionality is limited to project management.

Software and associated files is distributed as is without any warranty of any kind, either express or implied.

Using the Software

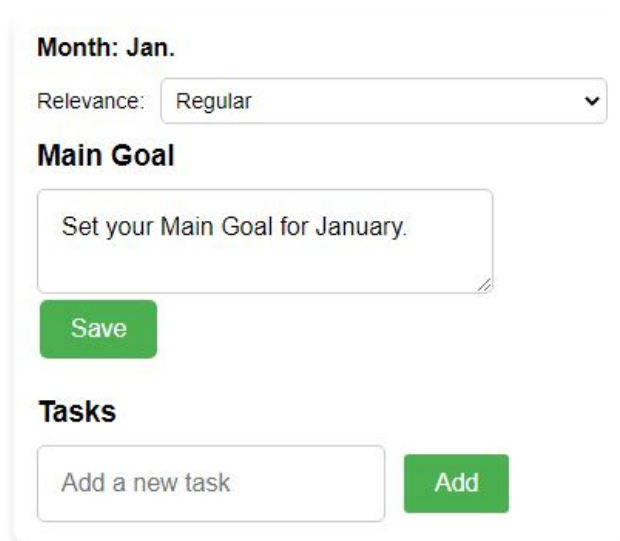

Using the software is really easy. When you open it, you'll see something like this.

The left panel allows you to see the months and when you move your mouse over a month, it will display the main goal for it.

The right sidebar shows you info about the selected month (by default is January but you can jump to another month by clicking it).

Here's a screenshot of the sidebar:

The right bar allows you to

- A) Set your main goal for that month
- B) Set the relevance of that month for you (when you change the relevance, it will change its color).
- C) Set your main tasks for that month.

Here i'm setting a Main Goal for December with some tasks, and i've set the Relevance to "High".

The image shows a circular calendar interface with 12 segments representing months. The December segment is highlighted in green and contains the text "Dec. W48-52" and "Launch Product XYZ". A tooltip also shows "Launch Product XYZ" over the Dec segment. To the right is a settings panel for the selected month (Dec.).

Month: Dec.
Relevance: High

Main Goal
Launch Product "XYZ"
